Materials hunt and word cards

Name: _____ Class: _____

Go on a materials hunt. Find an object made of each material. Draw it in the box, or stick in a photo. Then write or say the name of the object.

Made of wood

Object: _____

Made of metal

Object: _____

Made of plastic

Object: _____

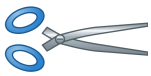

Made of fabric

Object: _____

Made of rubber

Object: _____

Made of more than one material

Object: _____

Take care. Take photos of objects, not people. Ask your teacher before you touch anything, and wash your hands after the hunt. Outside, follow your school's sun safety rules, and go back inside if you hear thunder or see lightning.

WORDS

Word cards for a display

Cut out the cards. Put each card next to a material it describes.

Cut along the dashed lines with round-ended scissors. Your teacher cuts any thick card.

rough

bumpy and uneven

smooth

even, with no bumps

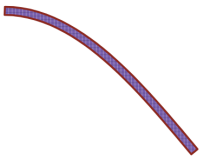

hard

does not change shape easily when you push it

soft

changes shape when you press it

bendy

bends easily without breaking

stiff

does not bend easily

waterproof

does not let water through

not waterproof

lets water through

Which card goes with each material in your display? Can one material have two cards?

For the teacher: page 1 goes with the materials hunt on screen 1, where students can take photos with a digital camera or a tablet. Page 2 goes with the display on screen 4. Print page 2 on card if you can. One material can have several word cards, such as smooth and hard for metal.
