Our weather chart

Name: Class: Dates:

Look at the weather at the same time every school day. Draw a symbol for the sky, circle still or windy, and write how the air feels. Your teacher will read the steps with you.

Weather symbols

Sunny

Cloudy

Rainy

Stormy

Still

Windy

STEP 1: RECORD ## Our weather for two weeks

Day	Sky: draw a symbol	Wind: circle one	The air feels
Monday		still windy	hot, warm, cool or cold
Tuesday		still windy	hot, warm, cool or cold
Wednesday		still windy	hot, warm, cool or cold
Thursday		still windy	hot, warm, cool or cold
Friday		still windy	hot, warm, cool or cold
Monday		still windy	hot, warm, cool or cold
Tuesday		still windy	hot, warm, cool or cold
Wednesday		still windy	hot, warm, cool or cold
Thursday		still windy	hot, warm, cool or cold
Friday		still windy	hot, warm, cool or cold

Take care. Never look straight at the sun. Look at the sky from the classroom or a shady spot. Stay inside if you hear thunder or see lightning.

STEP 2: COUNT Our picture graph

Use the Sky column of your chart. Colour one box for each day, starting at the bottom.

10				
9				
8				
7				
6				
5				
4				
3				
2				
1				
	 Sunny	 Cloudy	 Rainy	 Stormy

STEP 3: LOOK FOR A PATTERN What did we find?

Which sky did we have most?

How many days were windy?

What do you think the weather will be like next week? Why?

Next week I think the sky will be _____

For teachers: choose one time each day to look, such as the start of the day, because the sky can change during a day. The picture graph sorts the same days by their sky, as on screen 2 of the lesson. Answers vary. A good chart has a symbol for every day, and a picture graph with one box coloured for each day.
